---

Do the maths! (for boys age 7 – 9)

---

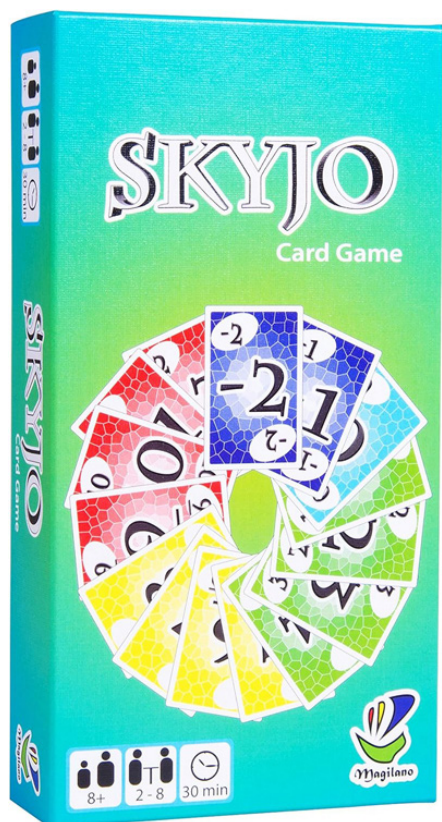

## What's the point of maths?

A book that unpacks how maths is part of our everyday lives, in ways we've never ever thought of.

Crazy facts, magic tricks, mathematical brainteasers and beautiful illustrations show readers that, far from being intimidating, maths is interesting and fun.

---

## SKYJO Card Game

A card game that involves addition, negative numbers, probability and strategy.

SKYJO is ideal for the whole family to play: accessible and fun, but sure to keep you on your mathematical toes.

---

### Rummikub

Rummikub is another maths game that the whole family can enjoy.

The rules are simple, but to win you'll need to plan carefully, and to think strategically.

### Hit the Button

This app helps children practise times tables, division facts, number bonds, doubling, halving and squaring numbers.

Know the basics and the higher order problems become easier, right?

Available in the **App Store**.
